## Created Research Datasets

- 2021 *Migration Model, 1997 – 2020*  
The Migration Model is a dataset that ascribes records pertaining to individuals that vacate a property to their most probable destination address, using a UK-wide population data set: the Linked Consumer Registers. The dataset comprises circa 42 million records. Access to this dataset can be secured through the Consumer Data Research Centre ([data.cdrc.ac.uk](http://data.cdrc.ac.uk)).
- 2021 *Linked Consumer Registers, 1997 – 2020*  
The Linked Consumer Registers are a dataset that contain the names and addresses for adults in the UK in annual snapshots from 1997 onwards to 2020. They are compiled from reported outputs from linking public versions of the electoral roll and consumer registers (supplied by value-added resellers). The dataset comprises circa 141 million records. Access to this dataset can be secured through the Consumer Data Research Centre ([data.cdrc.ac.uk](http://data.cdrc.ac.uk)).
